Cryptocurrency Mining Business: Monthly Report for May 2018

GMO Internet, Inc. hereby announces the monthly mining reward^{*1} and hash rate^{*2} in our cryptocurrency mining business.

[May 2018]

Hash rate rose due to the increase in the number of computers we are operating as planned.

	Mining reward ^{*2}		(Reference) rate as of the end of each month		Hash rate (unit: PH/s)
	Bitcoin (unit: BTC)	Bitcoin Cash (unit: BCH)	JPY/BTC	JPY/BCH	
Dec 2017	21	213	1,682,581	288,439	22
Jan 2018	93	25	1,093,163	159,348	27
Feb 2018	124	287	1,132,780	131,655	108
Mar 2018	295	12	740,777	73,773	129
Apr 2018	373	0	1,013,978	150,450	241
May 2018	472	37	821,434	108,909	299
Jun 2018					
Jul 2018					
Aug 2018					
Sep 2018					
Oct 2018					
Nov 2018					
Dec 2018					

*1: Mining reward is gained as a result of mining cryptocurrencies. We are currently mining Bitcoin (unit: BTC) and Bitcoin Cash (unit: BCH).

*2: Hash rate is an indicator of mining performance, the unit of which is H/s (the amount of computation per second). One PH/s means the amount of computation is 1 peta (1,000 trillion) times per second.

Hash rate is an important indicator for estimating our mining share. Our goal is to see the hash rate reach 3,000PH/s this year. Our mining share depends on the market's total hash rate, so increased hash rate does not necessarily lead to increased mining reward. For each currency pair, profitability fluctuates and the allocation of hash rate is based on an algorithm. The above figures are as of the end of each month.

*3: The Company shall disclose monthly information by the 5th business day of each month. Please note that the details of the disclosure and when the information will be disclosed may be subject to change without notice. Please note that the above is a preliminary data which may be subject to revision.
