**Announcement of Identification of Materiality (Key Issues)
 in the GMO Internet Group.**

GMO Internet Group, Inc. (the Company) has identified key issues (materialities) that the Group should address in order to realize a sustainable society and enhance its corporate value over the medium to long term.

1. Background to materiality identification

Since its founding, GMO Internet Group has consistently provided Internet infrastructure and service infrastructure, which are indispensable services that do not disappear, under the corporate slogan "Internet for Everyone"

In order to realize this "Internet for Everyone" vision, we have clarified "Ideal Future Vision" as a corporate group and identified the key issues (materialities) that we need to address in order to realize this vision.

2. Ideal Future Vision

With the corporate slogan: "Internet for Everyone" as the core concept, "Spirit Venture Declaration", which clearly states GMO Internet Group's dreams, vision and corporate philosophy, and the "55-Year Plan", which is a quantitative goal for the period up to 2051, define the "Ideal Future Vision" as "To become the company that is indispensable to society, bringing smiles and inspiration to customers by providing No.1 service." for the realization of these goals.

3. Materiality

The following six materialities have been identified as those that need to be addressed to realize the "Ideal Future Vision".
