General meeting of shareholders from next year onward

Preferred method of participation

Qualitative comments

- Chairman Kumagai is so polite and wonderful.
- Governance is effective, and I have high expectations for long-term growth. I look forward to GMO Internet's continued development as an Internet Infrastructure company.
- It was my first time participating in a hybrid virtual shareholder meeting, which was fair as I could ask questions virtually and participate no matter where I lived.
- I could watch the video easily even if I lived in a remote place without any problems. I want GMO Internet to continue holding a hybrid virtual shareholder meeting next year and beyond.
- I can feel the atmosphere of the management team and the company directly at the venue. I hope that the hybrid virtual shareholder meeting will not be held in the future.
- I would like all online questions to be answered on the website at a later date.
- At the venue, you can see the number of participants and the atmosphere of the people who are investing, which is impossible if you participate online, though it is convenient.

Thank you for answering the questionnaire.
